

Your neighbor – greedy Pandemic Profiteer, Moderna CEO Stéphane Bancel – has pocketed **\$408 million** since 2020 by selling Moderna stock.

...all while denying lifesaving mRNA vaccine technology to the rest of the world affected by COVID-19.

Under Bancel, Moderna has:

- Used \$1.3 billion of U.S. taxpayer money to make the vaccines. Now it expects to profit from it by at least \$19B in 2022 revenue.
- Only sent 1 million vaccine doses to help low-income countries; Pfizer and J&J have sent 8.4M and 25M, respectively.
- Charged struggling middle-income countries more than the wealthy U.S. and European Union.

Let Mr. Bancel and Moderna know their actions are unacceptable by using this QR code to tweet at them today!
