MESSAGE FROM THE AHF ASIA BUREAU CHIEF

The country program profiles provide an overview of key HIV data, AHF background, and the core strategies and activities implemented across Asia Bureau programs. They also outline the locations where AHF operates and collaborates closely with government counterparts, public health institutions, and civil society partners.

I am proud of the steady progress and resilience shown by Asia Bureau Country Programs from 2016 through 2026. Over this period, country teams have continued to expand HIV testing and treatment coverage, strengthen advocacy and public education, and build durable working relationships with Ministries of Health and national public health institutions. These efforts have remained closely aligned with AHF's core mission and values, even as operating environments and funding landscapes have grown more complex. In 2026, the Asia Bureau marked an important milestone with the launch of AHF's program in Bangladesh. This new country program reflects careful

preparation, strong local engagement, and a clear commitment to addressing gaps in HIV prevention, testing, and treatment. At the same time, several additional countries are currently under review, with desk reviews and in-country assessments planned or underway to guide future expansion in a responsible and strategic manner.

I would like to sincerely acknowledge the contributions of the AHF Global team, as well as our government partners, civil society organizations, and implementing partners across the region. Their collaboration and trust have been essential to sustaining and scaling our work over the past decade. Finally, I extend my deep appreciation to the Asia Bureau and all Country Teams for their consistent leadership, professionalism, and commitment to advancing HIV prevention, testing, care, and treatment throughout the region. Your work continues to make a measurable difference in the lives of the communities we serve.

Yours sincerely,

Dr. Chhim Sarath, MD, MSc.

Asia Bureau Chief

CAMBODIA

02

In 2005, **AHF Cambodia** founded its first program with the Ministry of Health and gradually expanded services with other healthcare agencies, including registering with the Ministry of Foreign Affairs and International Cooperation of the Royal Government of Cambodia.

Today, the program works collaboratively with the Ministry of Health through the National Centre for HIV/AIDS, Dermatology and STIs (NCHADS), Provincial Health Departments (PHDs), the Ministry of Defense through Preah Ket Mealea Hospital, and many local NGOs, groups, and networks supporting people living with HIV (PLHIV).

AHF Cambodia supports 42 HIV treatment sites throughout 71 HIV treatment facilities in 19 provinces nationwide. These sites provide free ARVs, OI treatment, and care to patients. Transportation allowances are sometimes provided to support patients in need. AHF Cambodia also provides free HIV testing and condoms at ART clinic sites and within communities.

In May 2017, AHF Cambodia launched a mobile testing van dedicated to reaching those living in remote areas, primarily around Cambodia's border where access to these services is challenging. The van provides HIV testing and treatment services to the most at-risk groups and their partners and families.

Through different supported programs, AHF Cambodia aims to improve treatment and care for HIV/AIDS patients at government hospitals, promote community HIV testing and the use of condoms, and prevent HIV, especially among high-risk populations.

Cambodia is one of the few countries in the world that has been successful in reversing its HIV epidemic and achieved near-universal access to HIV/AIDS treatment. Such success is only possible with contributions and joint efforts from different stakeholders. In 2010, the Cambodian government received a United Nations Millennium Development Goal award to recognize its success.

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls remain on treatment if HIV-positive, reduce unplanned pregnancies, and support them to stay in school. CHINA

03

AHF China officially launched its program in January 2006. Since then, in partnership with local organizations, AHF China has worked to expand access to HIV testing, treatment, and care. Efforts have included strengthening antiretroviral treatment plans, providing client support, and optimizing data-driven service delivery, alongside promoting HIV awareness, addressing stigma, and advocating condom use as part of comprehensive prevention strategies.

Programs such as the Tianjin Wellness Center and the Food for Health initiative in Hunan and Tianjin provide integrated HIV/STI services and nutrition-income support. Community-focused initiatives, including Girls Act and campaigns like International Condom Day and World AIDS Day, have reached millions, promoting prevention, stigma reduction, and empowerment.

Currently, AHF China collaborates with nine partners across eight provinces and municipalities, supporting 14 treatment hospitals and 10 HIV testing sites. These achievements demonstrate the program's effectiveness and the strength of AHF China's partnerships with government, community organizations, and healthcare providers.

Program Objectives and Key Projects:

1. Improve and Scale Up Treatment and Care – including the Wellness Center and Food for Health initiatives
2. Scale Up Prevention, Testing, and Linkage to Care
3. Raise Community Awareness and Strengthen PLHA Networks – including Girls Act
4. Improve Quality of Service Delivery
5. Advocate for Expansion of Our Model
6. Combination Prevention – including partner testing

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls remain on treatment if HIV-positive, reduce unplanned pregnancies, and support them to stay in school. INDIA

04

India Cares started operations in 2004, offering free HIV testing, treatment, and support. A pioneer in community-based HIV testing (CBT), India Cares successfully demonstrated the CBT model, leading to its recent adoption across the country. The first Center of Excellence ART Clinic in New Delhi was dedicated to the nation in 2007. Since then, India Cares has emerged as a leading HIV care organization in India, expanding clinical services to Panvel, Navi Mumbai, and offering free care, support, and treatment to nearly 4,000 people living with HIV (PLHIV).

India Cares spearheads Indian civil society advocacy on critical issues such as drug patents, drug prices, affordable treatment for HIV, hepatitis C, and TB, and the rights and entitlements of PLHIV. It also focuses on sustainable funding for HIV programs and the protection of women's, marginalized groups', and LGBTQ+ communities' rights.

To refocus on condom accessibility India Cares launched the country's first online free condom store. This was inaugurated and dedicated to the nation on the 10th Anniversary of India Cares. NGOs, CBOs, and even individuals can request free condoms by e-mailing freecondomstoreahf@gmail.com or calling 1800 102 8102 (toll free number).

By 2023, India Cares had distributed over 23 million condoms nationwide. The primary beneficiaries of the free online condom store include State AIDS Control Societies, NGOs, non-profits supporting high-risk communities, transgender welfare clinics supported by USAID, UN organizations, STI clinics, and numerous individuals.

Services Provided

India Cares Delhi clinic offers free antiretroviral therapy, laboratory services including CD4, mental health services, and routine medical checkups. The clinic also operates two satellite clinics in Narela and Jahangirpuri, which are on the outskirts of Delhi. The Mumbai clinic operates a satellite clinic with a partner organization – Kripa Foundation. For clients residing in faraway places or not able to travel to the clinics, medications can be sent by dedicated courier services. Courier services reduced the economic and physical burden of traveling and led to better adherence.

Partnerships

AHF India strategically partners with various organizations to expand services, including free HIV CBT, condom distribution, and ART treatment expansion.

India Cares has signed a service agreement with Palladium India to support community-based rapid testing, counseling, and linkage services in nine states.

In response to the heightened risk of long-distance truck drivers to HIV/AIDS, India Cares partners with Varuna Group, a leading logistics and trucking company, to promote safer sex practices, raise awareness, and ensure early detection and treatment within this community.

Varuna Group, in collaboration with India Cares, facilitates HIV awareness sessions, free STI/HIV screening, and distributes free condoms and hygiene kits. In addition, the company's trailers have been adorned with striking HIV/AIDS awareness graphics to visually reinforce the message.

India Cares partnered with Zoram Medical College in Mizoram to conduct CBT across various districts. Led by the Community Medicine Department at Zoram Medical College, this initiative provides students with hands-on experience in implementing public health programs.

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls remain on treatment if HIV-positive, reduce unplanned pregnancies, and support them to stay in school. INDONESIA

05

AHF Indonesia has been officially registered with the Ministry of Foreign Affairs and has maintained an ongoing collaboration since July 1, 2016, implementing an HIV testing and treatment program with six local NGO partners and in fifteen health centers. The services provided include patient laboratory tests, access to ART support, hospital staff capacity building, and organized advocacy meetings with the government on increased community testing and early treatment strategy.

AHF Indonesia implements programs in seven provinces throughout Indonesia (DKI Jakarta, Central Java, East Java, Bali, North Sumatra, East Kalimantan, and South Sulawesi) to promote the health and well-being among people living with HIV, including preventing opportunistic infections.

In recent years, the primary driver of the HIV epidemic has shifted from the injection of drugs to sexual transmission. Most of the key populations are in urban and peri-urban areas. Key affected groups continue to report high-risk behavior and insufficient awareness about HIV. Young people and other key populations can have more chances to learn about safe sex and the prevention of HIV/STIs.

In 2020, AHF Indonesia began collaborating with the Ministry of Social Affairs of the Republic of Indonesia, extending its partnership through 2026. The primary focus of the collaboration revolves around the Social Rehabilitation Program in HIV prevention, HIV early detection, treatment, therapy, and support for people living with HIV.

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls remain on treatment if HIV-positive, reduce unplanned pregnancies, and support them to stay in school. LAOS

06

AHF Laos, in collaboration with the Center of HIV/AIDS and STIs and the Ministry of Health (MoH), began operations in 2018 with a focus on decentralizing antiretroviral therapy (ART) to improve access to treatment across the country. Since its inception, AHF Laos has been committed to providing comprehensive HIV testing and clinical services, actively promoting condom use through public awareness campaigns aimed at reducing the spread of HIV and other STIs. AHF has also expanded its implementation sites to the Luang Prabang and Savannakhet provinces, partnering with 15 local organizations to extend its reach and impact in underserved regions.

In 2022, AHF Laos strengthened its collaboration with the government by signing a Memorandum of Understanding with the Ministry of Health and the Center of HIV/AIDS and STIs, launching a national initiative that focuses on improving HIV/AIDS prevention, testing, and treatment services. This partnership aims to enhance the government's capacity to address the HIV epidemic more effectively, particularly among high-risk populations, by closing gaps in HIV testing, ensuring those diagnosed with HIV are promptly linked to care, and expanding access to antiretroviral therapy and ongoing treatment.

In collaboration with the Technical and Vocational Education Department, the Ministry of Education, and local NGOs, AHF Laos works to train teachers in the provinces of Champasak, Salavan, Sekong, and Attapeu on the importance of comprehensive sexuality education (CSE). This initiative aims to equip educators with the knowledge and tools to teach CSE education, empowering students with vital information on safe sex practices. Additionally, condom dispensers have been installed in schools to improve access to free condoms, encouraging safer sexual behavior among young people and helping to reduce the spread of HIV and STIs.

In January 2025, AHF Laos opened its first wellness center in collaboration with partners focused on community health and inclusion, particularly among LGBTQ+ individuals affected by HIV/AIDS. The center offers integrated services including STI and HIV testing, mental health and chemsex screenings, PrEP support, and more. Emphasizing online promotion and outreach, the wellness center actively engages peer educators to expand access to services.

In 2024, AHF Laos launched the Food for Health (FFH) initiative, featuring two projects: dried catfish production and mushroom cultivation. FFH products are distributed to members living with HIV, with some sold to generate income that helps sustain the program. Participants also receive vocational training to support their own income-generating initiatives.

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls remain on treatment if HIV-positive, reduce unplanned pregnancies, and support them to stay in school.

MYANMAR

07

Since its registration with Myanmar's Ministry of Home Affairs in 2013 and its partnership with the Ministry of Health in 2014, **AHF Myanmar** has expanded its HIV services significantly. Initially supporting two HIV hospitals in Yangon, the program now operates across several regions, including ART centers in Yangon, Myawaddy, and Bago. AHF Myanmar's office in Yangon coordinates with government hospitals and the Ministry of Health's HIV/STI team to provide comprehensive antiretroviral treatment and care, focusing on reducing new infections, lowering AIDS-related deaths, and improving the lives of people living with HIV.

AHF Myanmar delivers high-quality HIV care by collaborating with partners to implement comprehensive treatment plans that include patient compliance guidance, consultations, and improving data management. The program also emphasizes peer-based voluntary counseling and testing (VCT), ensuring access to testing for key populations, such as bar workers and MSM. From January to December 2023, AHF Myanmar conducted 36,391 rapid HIV tests, identifying 1,364 new HIV-positive cases, with a 6% positivity rate. Mobile outreach teams play a critical role in reaching high-risk groups, offering free testing and linking positive cases to treatment.

In addition to testing and treatment, AHF Myanmar focuses on policy advocacy and public awareness initiatives. The organization supports the revision of HIV prevention policies alongside government departments and collaborates with community organizations to conduct educational campaigns and promote condom use in public areas.

Girls Act empowers girls and young women to stay healthy and thrive! NEPAL

08

AHF Nepal is committed to supporting the Government of Nepal in achieving the Sustainable Development Goals by expanding and strengthening HIV services. Since 2009, AHF Nepal has delivered HIV prevention, testing, treatment, and care in collaboration with 19 government-run ART clinics. Through its five-year initiative, “Sustaining the Gain” (2022–2027), AHF is enhancing the quality and reach of services by investing in capacity building, clinical mentoring, and technical assistance—implemented in coordination with the Ministry of Health and Population and under the guidance of the National Centre for AIDS and STD Control.

AHF prioritizes reaching key populations through peer-led HIV screening, targeted online outreach, STI and TB screening and referrals, and integrated community-based events. These efforts are supported by wide-scale condom distribution, prevention counseling, and strong linkage-to-care systems to ensure newly diagnosed individuals are promptly enrolled in treatment.

To ensure long-term impact, AHF Nepal continues to strengthen ART clinics by supporting human resources, conducting clinical and adherence training, and improving data management systems. Clients receive holistic support, including food assistance, laboratory services, transportation, and viral load monitoring. By addressing service delivery gaps and promoting inclusive, stigma-free healthcare, AHF Nepal remains a vital force in advancing the country’s HIV response.

PHILIPPINES

09

AHF Philippines was officially registered with the Securities and Exchange Commission (SEC) on February 9th, 2017. Since its inception, AHF has worked closely with community-based groups, local government units, and hospitals at various levels, including provincial, city, municipal, and Department of Health (DOH)-retained regional hospitals. Currently operating in seven out of the country's 17 regions, AHF has established a strong presence in HIV prevention and treatment across the Philippines and is set to expand further by forming partnerships with two additional sites in the Davao Region/Mindanao.

AHF-supported sites are recognized by the DOH and local governments, offering a comprehensive range of services. Currently, AHF Philippines supports 27 healthcare sites, with eight of them providing combination prevention services. These services include HIV and STI screenings, free distribution of condoms and lubricants, and access to pre-exposure prophylaxis (PrEP). These offerings are also available at local government unit-owned primary health centers, ensuring a wider reach across diverse communities.

In 2017, AHF entered into a partnership with The Love Yourself (TLY), a well-known non-government organization that caters specifically to the needs of men who have sex with men (MSM) and transgender individuals. Additionally, AHF partnered with a local government-run HIV facility and the San Lazaro Hospital, an infectious disease hospital that was the first in the country to offer HIV treatment. These partnerships are primarily based in the National Capital Region (NCR), where over 50% of the clients accessing HIV treatment services in the Philippines reside.

THAILAND

10

Established in 2014 to address the unmet needs of migrant workers, **AHF Thailand** has expanded its services to provide comprehensive HIV/AIDS prevention, treatment, and care. The program operates in collaboration with a network of over 40 partners, including government hospitals and community-based organizations across various provinces. AHF Thailand focuses on key populations that are often underserved, such as youth, men who have sex with men (MSM), transgender people, sex workers, people who use drugs, and migrant workers.

One of the program's key innovations is the launch of a government-community-based organization care model, designed to enhance HIV care services for Thais living in difficult circumstances. This model has improved access to antiretroviral therapy (ART) for many individuals who would otherwise face significant barriers. Through its extensive network, AHF Thailand serves over 87,000 clients and conducts almost 70,000 HIV tests annually.

In addition to promoting condom use and awareness through public campaigns and events, AHF Thailand actively advocates for improved HIV-related services. Key initiatives include expanding cross-border ART access for migrants, developing tailored service packages for clients engaged in chemical sex, addressing legal and social barriers to the decriminalization of sex work, and promoting non-discriminatory HIV policies in the workplace.

AHF Thailand has also adopted innovative approaches, such as targeted online testing for high-risk individuals. Since its launch in 2022, the initiative has shown promising results, with consistently high monthly HIV positivity rates among those tested. In 2024, the program recorded an overall positivity rate of 32.2% and achieved a per-positive unit cost of less than \$25. Through its multifaceted approach, AHF Thailand continues to close service gaps and ensure that vulnerable populations receive the care they need. In 2023, AHF Thailand launched the Food for Health program to support the livelihoods of underserved PLHIV. Selected clients received layer chickens and training on how to raise them. Some eggs were consumed by families to ensure adequate nutrition, while others were sold to generate income to cover barriers like transportation costs. Please note that AHF does not operate its own clinics in Thailand. Instead, we support HIV testing and treatment services through partner facilities. If you are not a Thai national registered under the National Health Security or Universal Health Coverage programs and would like guidance on accessing testing or treatment services, please don't hesitate to contact us.

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls living with HIV remain on treatment, reduce unplanned pregnancies, and support them to stay in school. To learn more about Girls Act or HIV testing, please get in touch with us at: Email: GirlsAct@aidshealth.org.

VIETNAM

11

AHF Vietnam launched its first HIV/AIDS care and treatment program in 2007 in Hai Phong City, in partnership with the Vietnam Administration of HIV/AIDS Control (VAAC) now is the Vietnam Administration of Disease Prevention (VADP) and the Hai Phong Provincial AIDS Control Center (now is Hai Phong CDC).

Building on this foundation, the program expanded to Ho Chi Minh City in 2012, collaborating with the Ho Chi Minh City HIV/AIDS Prevention and Control Center to broaden access to comprehensive HIV services in southern Vietnam.

Since 2015, AHF Vietnam has strengthened partnerships with the Global Fund and the Ministry of Public Security, expanding its work nationwide with a focus on linking community-based health facilities and prisons.

AHF Vietnam enhances HIV care and treatment, promotes community-based testing and condom use, and advances prevention—particularly among key and high-risk populations. The organization operates in 17 provinces and cities, including Ha Noi (the capital), Ho Chi Minh, Hai Phong, Thai Nguyen, Lang Son, Lao Cai, Tuyen Quang, Bac Ninh, Phu Tho, Ninh Binh, Thanh Hoa, Ha Tinh, Lam Dong, Dong Nai, Tay Ninh, Vinh Long, and Ca Mau.

In coordination with public health facilities, AHF Vietnam supports antiretroviral therapy (ART) across clinics, prisons, detoxification centers, and community-based organizations. Services include free HIV testing and counseling, condom distribution, treatment for opportunistic infections, and training programs to strengthen the capacity of healthcare workers and peer educators involved in HIV-TB care and treatment.

AHF Vietnam has received numerous commendations from the Vietnam Administration of HIV/AIDS Control, the Ministry of Foreign Affairs, and provincial People's Committees in recognition of its significant contributions to public health and HIV/AIDS care across the country.

Girls Act empowers girls and young women to stay healthy and thrive! We work to prevent HIV and STI infections, help young women and girls remain on treatment if HIV-positive, reduce unplanned pregnancies, and support them to stay in school.
